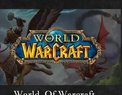
## 01/Inspiration

Inspiration Sources :

Octopath Traveler



World Of Warcraft

Game of Thrones

Dungeons & Dragons

Keywords : Snowy Frontier · Traces of Forbidden Magic · Hearthside Warmth

Growth of an Ordinary Person · Earning a Living by Logging · Evasive Counterattack

Hemlock and Fire draws on Octopath Traveler's HD-2D style, combining pixel art with three-dimensional environments. Snow, timber houses and warm lighting establish a cold frontier. World of Warcraft informs faction relationships and quest progression from logging to combat, while Game of Thrones shapes the family mystery and border conflict. Dungeons & Dragons inspires dialogue choices and melee or magic combat roles. The story follows an ordinary woodcutter whose father's old waybill connects everyday work and village life to a wider mystery involving forbidden magic.

Character

THYMIAS

24/Woodcutter/Protagonist

A 24-year-old woodcutter from Kama Village, Thymias earns his living through logging and trade. His father's old waybill draws him into a border dispute and the mystery of a sealed delivery. Driven by loyalty to his village and a need for answers, he moves from everyday survival toward confronting a wider conflict.

The snow-covered village is organized around a church, connected streets, and a river crossing. Dark stone, timber structures, and warm windows create contrast against the snow and help distinguish buildings from the surrounding landscape.

Magic Effects

- Fire effects progress from a concentrated buildup to a bright impact, followed by smoke and fading embers. Expanding shapes communicate the scale and direction of each spell.

Sword Effects

- Curved trails follow the weapon's swing, emphasizing direction and reach. Short-lived flashes and particles reinforce the moment of impact.

Timing & Readability

- Frame sequences show how each effect builds, peaks, and dissipates. Changes in size, brightness, and density help separate anticipation, action, and recovery.
